Fyi, anymeco do not save Food Grown Right, In Your Backyard: A Beginner's Guide to Growing Crops at Home download pdf on our server, all of pdf files on this site are found via the syber media. We do not have responsibility with content of this book.

As the founders behind the Seattle Urban Farm Company, Colin McCrate and Brad Halm have heard it all: My backyard is too small; how can I make space for a garden? Do I really need to buy fertilizer? What on earth is that creature crawling on the tomatoes? My crops took off and the zucchini are in the sidewalk -- who has time to harvest this all?!

Food Grown Right, in Your Backyard is a primer for these questions and more. In response to the rising interest in homegrown foods, the Seattle Urban Farm Co. builds vegetable gardens for everyone from busy families to restaurants. Along the way, Colin and Brad teach beginner growers from all walks of life the techniques of organic food production. In this full color, beautifully photographed guide, they prove that anyone can develop a "green thumb," as they show readers how to build a garden from the ground up, explain general garden basics, discuss the best types of crops to try, and much more, including:

- \* Garden size and design for any setting (no matter how small!), including container gardens
- \* Soil types, and watering and irrigation
- \* Plant life 101, and profiles of recommended vegetables, herbs, edible flowers, and berries
- \* Garden tools and time-saving rules
- \* Crop planning, tips on what to do with the harvest, and a garden calendar to keep your garden growing year-round

Q&A material, profiles of other beginner gardeners, and step-by-step instructions all come together in this unique, friendly guide that was inspired by the kinds of questions Colin and Brad hear every day on the job with the Seattle Urban Farm Co.
