* * * LIMITED TIME OFFER! Only \$2.99 (Regularly Priced At \$5.99)

If you are one of those people who are into planting or just interested in starting your own vegetable garden, this is for you. It will delve into important information that you will need to successfully tend to your garden. It will also give you tips and suggestion on how to handle situations, especially those regarding pests and plant diseases. In anything that you do, researching and reading about the topic is the best way to start. Talk to as many people as you can. A person who have a lot of experience in gardening and is in fact proud of his backyard garden will never be selfish in giving you a lesson or two. These lessons are invaluable as they will help you decide on the best actions you can take for your own fledgling garden. After you've concluded your research, it's time to get down and dirty. You can now start putting all the knowledge you've gathered into good use. Do not be afraid to ask questions. Expect to make mistakes, but with every mistake, learn whatever lesson you can. Urban farming does not really have tricks but more of a tip to make your mini farm even successful and progressive. These tips may include the proper soil to use, the fertilizer, what would be the appropriate seeds that you are going to plant and on how to make this plant healthy while growing.
